The urban and port ensemble of Corfu, dominated by its fortresses of Venetian origin, constitutes an architectural example of outstanding universal value in both its authenticity and its integrity. The overall form of the fortifications has been retained and displays traces of the Venetian occupation, but primarily interventions from the British period. Corfu was a well thought of example of fortification engineering and it proved its worth through practical warfare. Although many works have still to be completed or started, a Management Plan has been prepared. An urban action plan, which is in line with the management plan of the nominated property, has just been adopted (2005) for the period 2006-12.

Criterion iv

It is an outstanding example of a type of building, architectural or technological ensemble which illustrates (a) significant stage(s) in human history.

The urban and port ensemble of Corfu, dominated by its fortresses of Venetian origin, constitutes an architectural example of outstanding universal value in both its authenticity and its integrity. The overall form of the fortifications has been retained and displays traces of the Venetian occupation, but primarily interventions from the British period. Corfu was a well thought of example of fortification engineering and it proved its worth through practical warfare. As such, it can be taken as a model for Mediterranean fortified port cities.

Many works however have still to be completed or started. A Management Plan has been prepared. An urban action plan, which is in line with the management plan of the nominated property, has just been adopted (2005) for the period 2006-12.

A collective Action Plan for the protection of the included cultural assets and their balance with the needs of contemporary life and development.

5 Categories of Management Issues

- Implementation and Impact of the Plan
- Protection and Conservation of the Site
- Documentation, Education and Research
- Physical access and Transport
- Visitor Management

Localality & the Implementation of the Plan
